## KINGSPAN LAUNCH NEW PIPE AND DUCT INSTALLATION QUICK GUIDE

Kingspan Insulation Ltd, leading manufacturers of high and premium performance insulation products, has launched a new Quick Guide specifically for Building Services and HVAC applications.

The conveniently sized A5 guide provides contractors and specifiers with comprehensive information on the full range of Kingspan Kooltherm zero ODP Pipe and Duct Insulation products and summary information on the revolutionary Kingspan KoolDuct zero ODP System of pre-insulated ducting.

The user-friendly publication is produced in a clear and concise format that makes information readily available and easy to understand.

As well as technical performance data and tables showing the insulation thickness needed to achieve the thermal performance requirements of BS 5422: 2001, the new guide provides information regarding issues that need to be considered when choosing the most suitable insulation for a particular application.

The full range of issues addressed by the guide is as varied as Ageing & Long Term Degradation, the Climate Change Levy and Enhanced Capital Allowances.

As with all Kingspan Insulation product literature, technical data in the Building Services Quick Guide covers the Company's most recent product developments, ensuring that specifiers, contractors, stockists and end users have up to date information about the Kingspan Insulation product range.

The Kingspan Kooltherm zero ODDP premium performance CFC/HCFC-free rigid phenolic insulation panels.

All of these products provide a superior fire resistance and the lowest thermal conductivity of any commonly available insulant for Building Services/HVAC applications.

To obtain the new Kingspan Insulation Building Services Quick Guide contact the Kingspan Marketing Department on the following numbers:
